Special Instructions:

In the case that the application from the SMART App Launcher does not work. This can be cloned and deployed on a local machine. To do this, clone the repository and make sure node.js and chart.js is installed. Go into the index.html code file and comment out line 68 `<script src=".lib/js/get-data.js"></script>` then uncomment line 71 `<script src=".lib/js/get-data-test.js"></script>`. Once that is completed, open up index.html in a web browser and the application should be present.
